REVISIONS

REVISION	DESCRIPTION	DATE	APPROVED
-	Initial release		
A	Include paragraph 3.3.3.1 clarification of microcircuit technology, SEL rating	7/17/07	
B	Clarification, paragraph 3.3.3.1, Figure 1	2/14/08	
C	Change to microcircuit manufacturer, paragraph 3.3.3.1	8/04/08	
D	Clarification, paragraph 3.3.3.1. Add HCMOS logic option.	8/27/08	E.Jackson

1 SCOPE

- 1.1 Scope. This specification establishes the detail requirements for hybrid, hermetically sealed, crystal oscillators for use in space flight missions.
- 1.2 Part number. The part number shall be as specified in Table I herein.

2 APPLICABLE DOCUMENTS

- 2.1 Specifications and standards. Unless otherwise specified, the following documents shall be applicable to this specification to the extent specified herein.

SPECIFICATIONS

401-0298-001 Hybrid Crystal Oscillators, Class S, General Specification For

3 REQUIREMENTS

- 3.1 General requirements. The individual item requirements shall be as specified in the General Specification with the exceptions, modifications, and additions specified herein.
- 3.2 Approved manufacturer. Hybrid crystal oscillators shall be supplied from the manufacturer specified in paragraph 7.1 herein.
- 3.3 Design and construction.
 - 3.3.1. Outline dimensions and terminal connections. The outline dimensions and terminal connections shall be as shown in Figure 1 herein.
 - 3.3.2. Package body and lead finish. The package body and lead finish shall be gold in accordance with MIL-PRF-38534.
 - 3.3.3. Active Devices. The microcircuit used in this part shall use CMOS technology and shall be from a wafer proven to be radiation tolerant to 100 kRad (Si) total ionizing dose.
 - 3.3.3.1 CMOS microcircuit usage. For frequencies below 12 MHZ the output microcircuit shall be Intersil Corporation 54ACS/HCS family, Silicon on Sapphire CMOS technology. For frequencies greater than or equal to 12 MHZ, the CMOS microcircuit shall be 54AC00, see DSSC SMD 5962-87549. This microcircuit is specified to be *single event latchup free* for LET up to 93 MeV-cm²/mg. For output frequencies from 12 MHZ to 100 MHZ, the manufacturer shall be ST Microelectronics Corporation; for output frequencies greater than 100 MHZ, the manufacturer shall be National Semiconductor Corporation
- 3.4 Performance requirements.
 - 3.4.1. Maximum ratings. The maximum ratings shall be as specified in Table II herein.
 - 3.4.2. Electrical performance characteristics and limits. The electrical performance requirements and limits shall be in accordance with Table III herein.
 - 3.4.3. Delta limits. Except for frequency aging (refer to Table III), delta limits shall be in accordance with the General Specification.
 - 3.4.4. Total dose radiation limits. Hybrid crystal oscillators supplied in accordance with this specification shall be capable of meeting the performance requirements after being exposed to 100 krad total dose radiation levels.

4 QUALITY ASSURANCE PROVISIONS

- 4.5 General. The quality assurance provisions shall be in accordance with the General Specification with the exceptions, modifications, and additions specified herein.
- 4.6 Screening tests. The screening tests shall be in accordance with the General Specification.
- 4.7 Quality Conformance Inspection. Quality Conformance Inspection shall be in accordance with the General Specification and shall be required only when specified by the purchase order.

5 PACKAGING

- 5.1 Preservation, packaging and packing. Hybrid crystal oscillators shall be prepared for delivery in accordance with the General specification.

6 NOTES

- 6.1 Notes. The notes of the General Specification are applicable to this drawing.
- 6.2 Ordering information. The procuring activity shall advise Q-Tech Corporation at the time of Request for Quotation if quality conformance inspection is to be required.

NOTES

1. The limit for frequency/temperature stability (tolerance) shall be referenced to the specified nominal output frequency.
2. Unless otherwise specified the limits are over the full operating temperature range, under specified load conditions and at nominal supply voltage.
3. Unless otherwise specified, all measurements are in accordance with MIL-PRF-55310.
4. Up to 30 days after shipment.
5. Voltage values are with respect to network ground terminal.
6. A standard CMOS load of 10 kOhm || 15 pF shall be used. See MIL-PRF-55310/26 for CMOS waveform measurement definitions.

NOTES:

1. Dimensions are in inches.
2. Lead numbers are for reference only and are not marked on the unit.
3. All pins with function NC may not be connected as external tie or connections, except they may be tied to Ground.
