CA101, CA201, CA301A, LM201*, LM301A*

Operational Amplifiers

For Commercial, Industrial, and Military Applications

Features:

- *Short-circuit protection and latch-free operation*
- *Unity-gain phase compensation with a single 30-pF capacitor*
- *Replacement for industry types 101, 201, 301A*
- *CA301A Slew Rate (Summing ampl.) 10 V/μs*

The RCA-CA101, CA201, and CA301A are general-purpose, high-gain operational amplifiers for use in military, industrial, and commerical applications.

These types, which are externally phase compensated, permit a choice of operation for optimum high-frequency performance at a selected gain; unity-gain compensation can be obtained with a single 30-pF capacitor.

All types are available in 8-lead TO-5 style packages with standard leads (T suffix), and with dual-in-line formed leads ("DIL-CAN", S suffix). The CA301A is also available in the 8-lead dual-in-line plastic package ("MINI-DIP", E suffix), and in chip form (H suffix).

Applications:

- *Long-interval integrator*
- *Timers*
- *Sample-and-hold circuits*
- *Summing amplifiers*
- *Multivibrators*
- *Comparators*
- *Instrumentation*
- *AC/DC converters*
- *Inverting amplifiers*
- *Sine- & square-wave generators*
- *Capacitance multipliers & simulated inductors*

*Technical Data on LM Branded types is identical to the corresponding CA Branded types.

File Number **786**

CA101, CA201, CA301A, LM201, LM301A

Maximum Ratings, *Absolute Maximum Values at T_A = 25° C:*

DC SUPPLY VOLTAGE (Between V+ and V⁻ Terminals):	
CA101, CA201	44 V
CA301A	36 V
DC INPUT VOLTAGE	±15 V
(For supply voltages less than ±15 V, the Input Voltage rating is equal to the DC Supply Voltage)	
DIFFERENTIAL INPUT VOLTAGE	±30 V
OUTPUT SHORT-CIRCUIT DURATION	Indefinite*
DEVICE DISSIPATION:	
UP TO T_A = 75°C	500 mW
Above T_A = 75°C Derate linearly at	6.67 mW/°C
AMBIENT TEMPERATURE RANGE:	
Operating —	
CA101	-55 to +125°C
CA201, CA301A	0 to +70°C
Storage (All types)	-65 to +150°C
LEAD TEMPERATURE (During Soldering):	
At a distance 1/16" ± 1/32" (1.59 ± 0.79 mm) from case for 10 seconds max.	+265°C

* At $T_A \leq$ 70°C and $T_C \leq$ 125°C (CA101); $T_A \leq$ 55°C and $T_C \leq$ 70°C (CA201, CA301A).
