

Analog Integrated Circuits Cross Reference

This Cross Reference lists Analog Devices by either industry standard part number or by manufacturer's part number for which there is an ON Semiconductor nearest or similar replacement. For devices not listed, or for additional information, contact the nearest ON Semiconductor Franchised Distributor or your local ON Semiconductor Sales Office.

In this guide, the replacement columns provide the ON Semiconductor recommended nearest and/or similar replacement part. Where the industry device title and the ON Semiconductor nearest titles are the same, that type number is the current ON Semiconductor standard product. The substitution acceptability must be determined by the user as nearest or similar recommended device may differ in either electrical and/or mechanical characteristics. It is highly recommended that the ON Semiconductor data sheet be consulted to decide if the ON Semiconductor replacement could be an acceptable alternative in the user's application.

Complete listings of all standard parts currently available from ON Semiconductor are published in ON Semiconductor's Price List.

When viewing this electronically, the easiest way to locate the part you are trying to cross is to use the find command in Acrobat Reader. Once the device has been found, obtain the data sheet by locating the part number in the selector guide tables. You can also obtain the data sheet there.
