NOTE 1: Normal selection criteria for TVS devices is by rated stand-off voltage (V_{WM}) and should be equal or greater than dc or continuous peak operating voltage.

NOTE 2: For bidirectional construction, indicate a CA as suffix after part number (e.g. M1.5KE33CA). For Bidirectional types having VWM of 8 volts and under, the ID leakage current is doubled. Bidirectional capacitance is half that shown in Figure 4 at zero volts.

NOTE 3: For unidirectional, the forward voltage (V_F) is 3.5 volts maximum at 100 Amps peak for 8.3 ms half-sine wave.
