

FEATURES

- 0 ... 1000 to
0 ... 5000 psia
- Low Cost
- Isolated
- Rugged - Stainless Steel
- Small Size
- Absolute Pressure
- Reliable Semiconductor Technology

GENERAL DESCRIPTION

These stainless steel devices were developed for pressure applications that involve measurement of a hostile media in harsh environments. These sensors will accommodate any media that will not adversely attack 316 stainless steel. This series uses SenSym's proven piezoresistive semiconductor sensor chip in an oil isolated housing. This design has proven to be highly reliable, stable and accurate.

The 13U series sensors feature either a weld ring collar or threaded mail port for pressure connection.

APPLICATIONS

- OEM industrial process control

ELECTRICAL CONNECTIONS

EQUIVALENT CIRCUIT

Pin Nos. for ref. only,
not market on part

13U... Cell

Pin Nos. for ref. only,
not market on part

13U... with Port

PRESSURE SENSOR CHARACTERISTICS (all devices)

Environmental Specifications

Temperature Ranges:

Operating
Storage

-10°C to +85°C
-20°C to +125°C

Shock:

75G for 6 msec

Insulation Resistance:

100 MΩ at 50 vdc

Vibration:

17g RMS

Maximum Ratings

Supply Voltage V_s

+7.5 V_{DC}

13U... - Series

Stainless Steel Isolated Pressure Sensor Cells

PRESSURE RANGE SPECIFICATIONS

Sensym Part Number	Pressure Range	Burst Pressure
13U1000A(C,M)	0-1000 PSIA	10,000 PSIA
13U2500A(C,M)	0-2500 PSIA	10,000 PSIA
13U5000A(C,M)	0-5000 PSIA	10,000 PSIA

PERFORMANCE CHARACTERISTICS¹

Characteristic	Min.	Typ.	Max.	Unit
Zero Pressure Offset $T_A = 72^\circ\text{F}$	-20	0	+20	mV
Full-scale Span ²	100	150	200	mV
Combined Linearity and Hysteresis ³	---	0.2	1.0	%FS
Temperature Coefficient of Span	-2600	-2300	-2000	ppm/ $^\circ\text{C}$
Temperature Coefficient of Resistance ⁴	+690	+750	+810	ppm/ $^\circ\text{C}$
Temperature Effect on Offset ⁴	---	+4	---	$\mu\text{V}/\text{V}/^\circ\text{C}$
Long Term Stability of Offset and Sensitivity ⁵	---	0.1	---	%FS
Response Time (10% to 90%) ⁶	---	0.1	---	ms
Input Impedance $T_A = 25^\circ\text{C}$	---	4.0	---	k Ω
Output Impedance	---	4.0	---	k Ω
Repeatability ⁴	---	0.1	---	%FS

PHYSICAL DIMENSIONS

Cell package

Mass: 11 g

Ported Male package

Mass: 23 g

Dimensions in inches (mm)

January 1998/073

SPECIFICATION NOTES:

1. Reference conditions (unless otherwise noted): Supply Voltage, $V_s = 5 V_{DC}$; $T_A = 25^\circ C$;
2. Span is the algebraic difference between the output voltage at full scale pressure and the output at zero pressure. Span is ratiometric to the supply voltage
3. Linearity is based on best fit straight line. Hysteresis is the maximum output difference at any point within the operating pressure range for increasing and decreasing pressure.
4. Typical error of the offset voltage over the 0 to 50°C reading. Note, the typical temperature coefficients of span and resistance are based on best fit line between 0 to 50°C.
5. Long term stability over a one year period.
6. Response time for 0 psi to full scale span pressure step change

ORDERING INFORMATION

Pressure range	cell	male port
0 to 1,000 psi	13U1000AC	13U1000AM
0 to 2,500 psi	13U2500AC	13U2500AM
0 to 5,000 psi	13U5000AC	13U5000AM
