## Maximum Ratings

500 mW DC Power Dissipation (See Power Derating Curve In Figure 1)  
 -55°C to +175°C Operating and Storage Junction Temperature

## Application

This surface mountable zener diode series is similar to the 1N957B thru 1N992B in the DO-35 equivalent package except that it meets the new JEDEC surface mount outline DO-213AA. It is an ideal selection for applications of high density and low parasitic requirements. Due to its glass hermetic qualities, it may also be considered for high reliability applications.

Note 1 Voltage measurements to be performed 20 seconds after application of dc test current.

Note 2 Zener impedance derived by superimposing on  $I_{ZT}$  at 60 Hz rms ac current equal to 10%  $I_{ZT}$ .

Note 3 Allowance has been made for the increase in  $V_Z$  due to  $Z_Z$  and for the increase in junction temperature as the unit approaches thermal equilibrium at the power dissipation at 500 mW.
