

## NTE5240A thru NTE5296A 50 Watt Zener Diodes ±5% Tolerance

### Features:

- Zener Voltage 3.9 to 200V
- Low Zener Impedance
- Highly Reliable and Rugged
- Also Available in Reverse Polarity (NTE5240AK thru NTE5296AK)

### Maximum Ratings:

Operating Junction Temperature Range, $T_{opr}$	-65° to +175°C
Storage Temperature Range, $T_{stg}$	-65° to +175°C
DC Power Dissipation, $P_D$	50W
Derate Above 75°C	0.5W/°C
Forward Voltage ( $I_F = 10A$ ), $V_F$	1.5V

Note 1. Suffix "A" denotes anode to case polarity, "AK" denotes cathode to case.

### Electrical Characteristics: ( $T_C = +30^\circ C$ , unless otherwise specified)

Note 2. Zener Voltage ( $V_z$ ) is measured with junction in thermal equilibrium with  $30^\circ\text{C}$  stud temperature.

Note 3. The zener impedance is derived from the 60 cycle A.C. voltage, which results when an AC current having an RMS value equal to 10% of the DC zener current ( $I_{zT}$  or  $I_{zK}$ ) is superimposed on  $I_{zT}$  or  $I_{zK}$ . Zener impedance is measured at 2 points to insure a sharp knee on the breakdown curve and to eliminate unstable units.
